**Subject:** RE: Oceano Dunes

Hi John,

Here are a few bullets that highlight the current efforts at Oceano Dunes:

- ARB senior management is continuing to work collaboratively with State Parks and the District to implement District Rule 1001 to mitigate PM10 impacts in areas downwind of the dunes, including the Nipomo Mesa. Mitigation measures, both implemented and on-going, include planting native vegetation, installation of wind fences, and use of straw bales.
- To aide in evaluating the effectiveness of the mitigation, Parks and the District have agreed to use particle dispersion modeling to better identify the location of emissions and assist in evaluating the extent and effectiveness of mitigation. ARB will lead the modeling effort.
- A Draft Environmental Impact Report (EIR) associated with implementation of the Oceano Dunes State Vehicle Recreation Area Dust Control Program was made available for public review on August 2, 2016.

Hope this helps.

Webster

I'll be out until Friday. If you can get to it this week, that would be great.

Hi John,

I'm just clearing out the last of my 400+ emails. I'll connect with you tomorrow a.m. on this?

Thanks,

Webster

Hi Webster –

Welcome back.

I sent the email below back on Sept 13. After getting your out of office message, I contacted Sylvia. She said she would look into it, but I'm not sure she's gotten to it. Any chance you could put together a few bullets or talking points that we could use in our response to Concerned Citizens for Clean Air?

Thanks

**Subject:** Oceano Dunes

Hi Webster –

Would it be possible for you to send me an email briefly highlighting ARB's efforts to help with the Oceano Dunes situation?

Thanks
